REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. The application is allowed based on provided remarks and additional search. The prior art made of record in the attached form PTO-892 considered to be pertinent to the submitted application.

Fujitani et al. US # 6,122,234 disclose recording disk drive using a synchronous driving motor. Wherein, upon the reception of the deceleration signal from pickup operation detector 101, counter 104 supplies a signal for reversing direction of the spindle motor 20. The torque commands are classified into the read mode and seek mode including three commands A, B and C. Wherein the torque command A is corresponding to read mode has a minimum torque value. The torque command B has a larger torque than A, and torque command C has the maximum torque and changes the rotation speed mostly. Excitation of motor can be changed to apply the above torques to the motor in reverse direction, in other words to bring motor rotation from the highest deceleration speed to the lower deceleration speed. However, not to reach the stop of the motor, but only to reach a speed corresponding to a reading torque command.

Yoshino et al. US# 5,220,257 teaches motor drive circuit using torque control circuit with braking control. Wherein upon receiving a stop signal a reversing torque is applied. Yoshino et al. teach application of two decelerating periods to stop the motor.

However, none of the prior art teaches or suggest in combination:

- That locking torque in the third period is derived to reach the stationary state.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rita Leykin whose telephone number is (571)272-2066. The examiner can normally be reached on Monday-Friday 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on (571)272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
